

Extend Your Security Beyond the Limits of Cables

Compliment your wired infrastructure with wireless security products — scalable, encrypted, get to places that were once cost inhibitive

Security Systems Unleashed

Wirelessly extend your existing security system to distances **previously unimaginable**

Inputs

Monitor up to

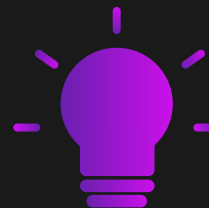

16

inputs per BASE

(Doors, Gates, Pumps, Status's, Flow rates etc)

Outputs

Trigger outputs (lights, sirens, doors, pumps, fans) from **2+ km away**

Card read's and Inputs

Long range security panel inputs (eg; card readers, sensors, telemetry)

Cabling Not an option?

Problem

Trenching, conduit runs or cable distance

Costs too high ↑

Solution

B-LINK connects directly through terrain, buildings, and barriers

Cost reduced ↓

* With correct antenna placement and site Interference dependent

Wireless

New wireless protocol to **exceed distance** + push through **more obstacles** than ever before.

Up to

2+ km*

B-LINK ensures **reliable, bidirectional** data transfer over **2+ km** line-of-sight.

Seamless panel integration

Plug-and-play with **leading panels** - with built-in resistance values

inner range

+ more systems

Custom Products

We have built our products to fill gaps — creating solutions to problems no one else has addressed.

Our specialists tailor every deployment to your site's unique requirements.

Battery Life

Years of use on a single battery

Secure communication

Military-grade

256 Bit
Encryption
keeps your site
secure

Unique options Unique applications

We engineered B-LINK for unmatched flexibility, ready to meet the unique demands of any site.
Discover how B-LINK can transform your operations — speak with Bravis today.
